January 2022 Blog #1 – Three Reasons Why You Should Put Your Exterior Cleaning On A Regular Schedule

With the new year upon us, now is the time many people tend to take stock of the important recurring maintenance items in their lives like their car, pool and landscaping. Oftentimes we wait until the new year to evaluate and/or implement new service contracts. It is important to consider and put your exterior cleaning on a regular schedule like you do for other home and lifestyle needs. Here are 3 reasons why you should put your exterior cleaning on a regular schedule in the new year:

Reason #1 - *It helps prevent damage:* If you fail to clean your property regularly, you can experience water leaks, mold growth, and ultimately, an unattractive home. As our weather can be extreme, it is extremely important to keep your home's exterior clean and protected. SoftWashing uses safe chemicals to aid in the break-down of contaminants and infestations so they can be easily washed away. The products used in the SoftWash System don't just clean -- they penetrate, sterilize and eliminate the root of the problem, while inhibiting future growth of mold, lichen, mildew, moss, and other environmental contaminants, keeping your home safe from the destruction that they cause.

Reason #2 - *Your home will look great year round:* Regular SoftWashing can increase your home's curb appeal year round and nothing compares to the look and feel of a clean home. Instead of waiting until there is dirt, mildew and grime on your home and roof, or waiting to spruce up your home until the holidays, you can make sure that your home looks like new year round with a regular schedule of SoftWashing.

Reason #3 - *It will save you money in the long run:* Black stains and streaks on asphalt shingles are not only unsightly, these stains are actually destroying your shingles, shortening your roof's life span. When it rains, the algae is spread, causing black streaks and stains. If these stains are left untreated, the black streaks will continue to grow causing lichen, which will then grow into moss. When moss and are allowed to grow, their roots penetrate the shingle furthering the deterioration and destruction process. A roof replacement can cost thousands while cleaning your roof regularly with SoftWash will return your shingles to like new condition at a fraction of the cost.
