

Patriot SoftWash

March 2022 Blog #1 – 3 Spring SoftWashing Tips

Spring cleaning makes us think of deep cleaning every room in our home where we focus on clearing out every closet and nook and cranny on the inside of the house from corner to corner to get that clean, fresh feeling. However, while most people focus on their home interior this time of year, it is important to remember your home's exterior. SoftWashing can enhance your spring cleaning chores in many ways. From moss and mildew caused by the harsh winter weather to dirty sidewalks at your entryways. SoftWashing can remove the traffic soil and brighten your sidewalks and entire exterior from the roof down.

If you are planning to get your house or business cleaned up and ready for the great spring weather, you don't want to overlook your exterior when doing your spring cleaning. Here are the top 3 spring SoftWashing tips you'll want know.

1. Spring Is The Best Time To Use SoftWash For Roof Cleaning & Algae Prevention

While DIY projects are tempting, cleaning your roof and property exterior should be left to the professionals. Those unsightly black algae stains on your roof are tough to get rid of and importantly, you want to prevent the algae from regrowth. Roof and shingle manufacturers recommend SoftWash for roof cleaning for many reasons. First and foremost, SoftWashing safely cleans roofs without damaging them with harsh pressure or harmful chemicals as SoftWash solution contains a biocide that helps prevent future algae growth. Plus, your roof warranty will not be compromised, and you will have longer lasting results, so you don't have to worry about having your roof and exterior cleaned as often.

2. Spring Clean Away Bugs and Nests

As the weather warms up, all types of critters begin looking for new places to nest. With a thorough exterior cleaning, bugs, spider nests, etc. will be washed away. This can further prevent damage to your home as with removing the nests, pests will find a new place to live.

3. Don't Forget to Dust Off The Siding

Much like the warranty on your roof, using improper cleaning methods can void your siding warranty. Not to mention, leaving moss, algae and dirt to continue to grow can cause rapid deterioration and the necessity to replace your siding before you should have to. With regular SoftWashing, your siding will be safely cleaned with the biocide that helps inhibit future growth.
